9:24		ASAM Update
9:24:59	Cutoff for Market Makers to "lock-in" their 9:25 ASAM	
9:25	4th public dissemination of imbalance	ASAM Update
9:26		ASAM Update
9:27		ASAM Update
9:28		ASAM Update
9:29		ASAM Update
9:29:30	All input closed; PRIs applied on side of imbalance	Final ASAM update
9:30 00	PRIMEX looks for first free open quote	
9:30 +	System executes entire amount of accumulated shares as a single block at one price The price for all is the opening quote on the side of the imbalance, unless the imbalance was completely zeroed out by the crowd and/or any MM lock-ins. Block shares and price is printed Execution reports distributed to participants	
about 10 00	System prints individual trades as "opening trade reports"	

- No cancellations of standing orders
- No new orders except those that would reduce any portion of imbalance not locked-in by MMs.
- Proprietary orders by BDs ok
- If post-locked-in imbalance goes to zero, this is announced and additional orders seeking to reduce imbalance will be rejected.

The ASAM will be static here for those MMs who chose to Lock-in as of 9:24:59
